Old Settlers' Day A Great Success

Ideal Weather and Large Crowds Add to the Pleasure of the Day.

TUESDAY, Feb. 22, Washington's Birthday, was the twenty-fourth annual celebration of Old Settler's Day. The day was ideal and many of the early pioneers of this section of the County were present. The occasion might have been turned to a blossom fete so many of the fruit trees were in bloom.

President S. G. Rodeck of the Improvement Club had selected the various committees with the sole idea of results and everything was in readiness for the entertainment of all.

Mrs. Allen

J. F. Duncan, chairman of the day, in a few well chosen remarks

gave the address of welcome, defining the origin and purpose of this

annual gathering.

After invocation by the Rev. W. H. Lloyd, the glee chorus sang,

"Song of Spring" by Arthur Pearson.

The speaker of the day, Judge Thos. J. Lennon of San Francisco,

took as his subject "the Pioneer Settler and Washington the Prophet."

He stated that he had thought that Marin County was the only place in

this state where a "Pioneer" day was held but was glad to learn that

such an occasion was an annual affair in this county.

In speaking of the pioneer he said, "He was a state-builder, was the

pioneer, and with master hand he set the

foundation stones of this great state in its

ever-enduring adamant. It should there-

fore be the purpose and aim of every one

of our citizens to cherish and revere the

memory and deeds of the pioneer build-

ers until the end of time, and to perpetu-

ate in all of its original beauty and design

this great structure of statehood, which

as it grows from day to day and year to

year is destined to be the grandest prod-

uct of human energy and endurance that

has ever come forth from the womb of

Time. If ever a people became a per-

petual debtor to a set of men for all that

they are in conscience and at heart,

these people are the men and women of

California—and that set of men are the

pioneers of this state.

"To them we are indebted not alone

for life, but for all that is more than life

itself—principle, conscience, soul.

Therefore I may safely say to you all

that California will advance or halt in her

progress just in proportion as we, her

sons, native and adopted, continue to

revere the memory and practice the prin-

ciples of the 'Men of old, the men of

gold, the men of 49.'

Lunches were enjoyed at the I. O. O.

F. hall at noon when many family and

party reunions were formed about the

tables. The High Alumni reunion was

the largest, about 50 being present, rep-

resenting every class except the first

two.

The afternoon program in charge of

Dean Allen was greatly appreciated and

each number was roundly applauded.

During the lunch hour a hot baseball

game held the attention of many. Camp-

bell High lost to a San Jose team 5 to 2.

Our boys need some real hard practice

with the willow and at times show an

inclination to slippery fingers, but the

material is there all right and needs only

to be developed.

The basket ball game, Camels vs. Los

Gatos High, was a great attraction and

alho-rather one-sided furnished some

real entertaining sport. The Camels

won 72 to 25. Righter, Kennedy and

Bryant leading in baskets Cramer and

Launcester doing some excellent offensive

playing in breaking up the opponents' plays.

Smith's for Account books.

Mr. and Mrs. C. G. Hanger spent the

week-end at their cottage at Seabright.

Mrs. Elizabeth S. Brown of San Fran-

cisco was the guest of Mrs. G. C. Brad-

ford for the past week.

Miss Anna Hagelin is nursing a frac-

tured and strained arm as the result of a

fall while performing on roller skates.

George Hereford, for the past two

years one of the barbers here, left Mon-

day with his equipment. He left no

word but it is thought he went to Oak-

land.

Among the out-of-town visitors at the

Old Settlers' celebration were Mr. and

Mrs. Geo. Beaver of Palo Alto and Mr.

and Mrs. L. T. Cook of San Jose who

never miss this day to meet old friends

at Campbell.

Sunnyside has beaten us to it by sev-

eral weeks. They are boasting of two

high power lights which were installed

recently and add very much to the plea-

sure and convenience of the residents.

The residents of that tract are to be con-

gratulated on their enterprise and Camp-

bell expects to soon boom up in a similar

"Uncle Sam Health Food Saved My Life!"

A rather startling testimonial; but genuine, and given by a resident of Campbell.

Uncle Sam Health Food is a laxative breakfast food, composed of wheat flakes flavored with salt and celery, properly proportioned and thoroughly blended.

Requires No Cooking: ready to be eaten with cream or milk and sugar. Also with fresh or cooked fruit, or fruit juices.

Endorsed By Physicians Everywhere. Some remarkable benefits have resulted from the regular use of this food.

Not a Medicine, But a Natural Food Laxative.

Sold in packages, at 25c.

CURING ASTHMA WITH EGGS

Simple Remedy That Is Well Worth Remembering by the Mother of Small Children.

There are many children and women who need the nourishing element of eggs yet cannot eat them without distress and unpleasant effort. Sometimes even the sight of cooked eggs is repulsive to these people.

The real food value in eggs is the proteid substance. Proteid substances are the main fuel for work and growth. A person to be in good health must have a certain amount in their daily food.

There is a chemical condition in most persons at times which causes a repugnance to certain foods. It is a body reaction. The doctors call it anaphylaxis. It is really a susceptibility to poisoning by certain foods, or in a psychologic sense, a reaction of normal instincts.

For example, some women cannot eat underdone meat or well-cooked fish—any albuminous food. Others cannot bear the association of men, while others desire to have all the rights and privileges of the male with none of the responsibilities of women.

Dr. Fritz Talbot of Boston has discovered that asthma in children is generally due to "egg poisoning," as mothers say. That is, in these children the proteid substance irritates the nervous system and asthma results.

As in most conditions of body poisoning so in this, the body can be immunized by the cause itself. To immunize the body so no reaction will take place from egg eating, you can vaccinate the child with the white of an egg. After the skin has been washed with soap and alcohol the white of an egg is rubbed into a slight scratch. One application will generally cure the asthma.

First Catch Your Rat.

In many places of the country rats have been far greater pests than usual and this has led a Scranton man to write as follows to the New York Times:

"Before coming to Scranton I was located in a mill, situated on a river bank, and in the fall of the year we were always troubled with rats in large numbers, which caused great damage and annoyance and we, therefore, were very much interested in eliminating the pest. The thing that we found most efficient in this line was a bacteria called azoa, which will not affect dogs or cats or poultry, or pets of that nature, but will inoculate the rats and, as the bacteria develops, it destroys the animal. Rats being cannibalistic in their nature, feed on one another, and in this way they distribute this disease among themselves and work their own destruction. In the experiments that were made with this bacteria in its early stages, some of it was used on isolated farms, and later rats were found to be destroyed by this material three to five miles from the original place in which it was fed."

Russia's Dogs of Mercy.

A further proof of the patriotism of the noncombatant classes in Russia is offered by the assiduity and enthusiasm with which the proprietors of kennels in the capital, in Moscow, and in other large cities have devoted themselves to the training of dogs intended to be sent to the front as dumb but noble "brothers and sisters of mercy."

It has become a favorite occupation of the upper classes to indulge in this highly serviceable and humanitarian work. The dogs are being trained not only to search for the wounded on the deserted battlefields and to deliver bandage material and first-aid medications, but also to warm them and revive them in case of unconsciousness.

The conditions of modern warfare are such as to make it frequently necessary for the soldier to advance towards the enemy's position under fire, hiding as he advances in bushes, marshes and glens. In these circumstances the tracing of the wounded would be extremely difficult without the aid of the canine instinct and intelligence.

Insect Warriors.

Talking of insects as warriors, an amazing proposition was once submitted to the French minister of war by a professor at one of the leading colleges in Paris. It was that large blow-flies should be bred and kept in cages, where they should be fed on blood placed between the artificial skin of dummy figures dressed up in the enemy's uniform.

When war had been declared, the insects were to be fed on the sap of certain tropical plants in order to make them venomous. Then, conveyed to the front, they could be released from their cages to make short work of the enemy.

Country of Lakes.

Finland has an area of 144,249 square miles, of which one-seventh is water on account of the innumerable lakes in the interior. At the end of 1914 its population amounted to 3,196,700, divided among eight lands, or governments. Of the population of the grand duchy, less than one-sixth live in the cities, of which there are only fifteen having more than 5,000 inhabitants. Helsinki, the largest city, has a population of 154,000.

Charting The Arctic Archipelago

AFTER a cruise of more than 4,000 miles through the Arctic archipelago, during which he placed on the map many new islands, bays and promontories, Capt. Joseph E. Bernier has returned to warmer climes.

During eleven years of Arctic exploration this hardy skipper has charted over 500,000 square miles of islands in the great northern archipelago and has discovered many records of Arctic expeditions, including documents left by ill-fated mariners, and pieces of wreckage, grim reminders of craft that went down in the Arctic seas, writes C. H. Dorr in the New York Sun.

Captain Bernier has left a record of his own work in various places to guide future explorers. If Vilhjalmur Stefansson, leader of the Canadian Arctic expedition, now in the polar regions, happens to reach Winter Harbor, Melville island, he will find there a substantial cache built several years ago by Captain Bernier, and well stocked with provisions, enough to last him a year or more. Captain Bernier established many of these caches or life-saving stations in the polar regions, for he knows by experience the needs of Arctic explorers.

Relics of Former Explorers.

On his last voyage Captain Bernier started from Pond's Inlet, Baffin's island, with the exploring ship Guide and a crew of ten men and an equipment including forty dogs and sledges. While voyaging through Arctic seas two of his crew found parts of the hull of one of the vessels of Sir Edward

Belcher from regions to the westward, and comparison showed that these specimens were of the same type as the diatoms brought from Cape Wadardum, in Asia.

"The finding of these diatoms proved that a passage existed from the Pacific to the Atlantic, but did not indicate the time it took to pass through from sea to sea. Later an American harpoon was found by an English whaler in the Atlantic Arctic sea, which proved also that there was a passage by which a whale could go through."

"Then later on wreckage of the Jeannette and some part of the clothing of two members of the Jeannette's crew came ashore on the west coast of Greenland at Julianehaab. This proved to me that if the Jeannette had not been lost she would have drifted into the Atlantic ocean in about four years and a half. It also proved that there is a passage from ocean to ocean."

"When the Fram was caught in the ice she drifted into the Atlantic ocean from the Pacific, which also proved my theory of a free passage. When Admiral Melville and President Bryant of the Philadelphia Geographical society placed casks in Bering strait and set them adrift they demonstrated the time it took to pass from ocean to ocean."

"Now the last link in my theory is illustrated by the wreck of the Kariuk, Stefansson's ship, which was caught in the ice off Point Barrow. It was not a good place to start, but she drifted in a short time to latitude 73 north, and would have completed her voyage to the Atlantic in about four years, be-

Belcher's squadron. These relics of Arctic disaster were discovered on the north end of Bylott's island, in the Arctic sea.

Captain Bernier believes that these relics were part of the Pioneer or the Intrepid of Sir Edward Belcher's squadron. Three vessels in the Belcher squadron were not accounted for, the Pioneer, the Intrepid and the Assistant. The Pioneer was abandoned in the Arctic and all on board were lost.

Another relic of the Arctic found by Captain Bernier's crew is a spear from Sir John Franklin's expedition, which drifted in on the tide in Erebus bay, North Devon island, the bay being named after the Franklin ship Erebus. It is a wooden spear with iron point, which drifted in on the tide in Erebus bay, and the name Erebus stamped upon it. The spear from the Franklin expedition was probably lost overboard in a storm and drifted, swept on by ice and tide, to Erebus bay. The wreck of the Erebus was found on O'Reilly island, south of Victoria strait, by Eskimos years ago.

For fifteen days Captain Bernier and members of his Arctic expedition on board the Guide were caught in the ice of Melville bay, in latitude 75. After battling with huge masses of ice drifting down from the north for two weeks the Guide managed to get free from the ice packs and make her way into the open sea.

An interesting theory of a route to the pole for a vessel is advanced by Captain Bernier, and is based upon deductions made from his discoveries of relics of marine disasters in the Arctic and study of the polar tides. He believes that, starting from a certain point in the Arctic, a ship well equipped can make the voyage from ocean to ocean and to the Pole.

Thinks Ship Can Reach Pole.

"Capt. George De Long was a pioneer in the field of Arctic exploration," said Captain Bernier the other day while in New York, "and his first expedition aroused my interest in voyages in the North Pole regions."

"I followed De Long's expedition with keen interest, and I realized that he was undertaking a voyage almost certain to lead to destruction. But his experience pointed out a route leading into the northland, and other explorers have doubtless profited by his example. When Doctor Nansen proposed a trip to the Arctic he planned his voyage along the lines of Doctor Long's trip to the polar seas."

"Diatoms found on the east coast of Greenland are similar to those brought back by that great explorer Norden-

cause she was drifting faster than the Jeannette."

On his last voyage the captain secured numerous interesting pictures of Eskimo life in the Arctic; the midnight sun, fishing in the far North, seal hunting and norwhal hunting over the ice.

HAVE NEW ENAMEL PROCESS

Mixture Can Be Applied Cold, Without Injury to the Most Delicate Objects.

There are many small objects whose beauty is much enhanced by the application of a coat of enamel, but which are not capable of being fired. A process of enameling these in the cold, so simple as to be quite practicable for amateurs, is described in La Nature as follows: To a solution of sodium silicate, boiled in a closed vessel, there is added about 5 per cent of sulphate of lime. This causes a precipitation to take place, the ulterior effect of which is to prevent efflorescences which would injure the looks of the enamel. The solution, after being once decanted, assumes the consistency of a paste which is heated to about 75 deg. Cent. to apply to the objects to be enameled. A second decantation takes place in the vitreous layer, and this then takes on an unalterable translucence. It may be tinted any desired shade, either in the mass or superficially, the colors being fixed by tannates of gelatin and alum.—Scientific American.

Teaches History of City.

New Orleans has adopted the New Orleans book as a textbook in the public schools. This book contains a succinct history of the city from its earliest days, a review and summary of its industries and commerce, a study of its people, their institutions, government and organization; in fact, it presents in a compact and convenient form facts which "every citizen should know and most of the city's visitors inquire about."

Prudence.

"Have you studied the question thoroughly?" "What question?" asked Senator Sorghum.

"The one on which you are about to make a speech." "No. I carefully avoided studious consideration of the matter. In case my remarks do not prove agreeable to my constituents, I want them to sound as if I spoke impulsively."

PUZZLED OVER WOMEN

FEMALE SEX A MYSTERY TO THE HEBREW SAGES.

Classed With Fools as Subjects Beyond Comprehension—Remarks Made by Author of the Book of Ecclesiasticus.

Two subjects seem to have occupied the attention of the Hebrew sages to a marked degree. They are always recurring to them. In the midst of maxims about the conduct of life the sage cannot forbear to take a side swipe at fools and women. He finds them both beyond comprehension.

To get his point of view it is necessary to remember that there were no asylums in the Orient. Every village had its imbeciles, who were a feature of the town life. The village fool was a far more prominent person in the ancient East, and forced himself much more on public attention than the feeble-minded person of today, who usually is kept in the background.

As for women? Well, the ancient world never was able to make them out any way. Their incessant chattering was evidently a great annoyance to the solemn, white-bearded patriarchs.

One of the most human of the ancient sages was the author of the Book of Ecclesiasticus in the Apocrypha, Jesus, the son of Sirach. His book has a distinct flavor, a quality that makes it entertaining reading. The imagination pictures him a man of gracious dignity, reserved, serious, taking his obligations with the gravity of his race. Experience has disclosed to him most of the mysteries of the world—except women.

"A daughter," he confesses, "is a secret cause of wakefulness to a father, and the care of her putteth away sleep." That seems to have been the general attitude of the sages toward the female aspect of affairs. He enlarges on the subject in another place:

"I will rather dwell with a lion and a dragon than keep house with a wicked woman. The wickedness of a woman changeth the look and darkeneth her countenance as a bear doth. Her husband shall sit at meat among his neighbors, and when he heareth it he sigheth bitterly. All malice is but little to the malice of a woman; let the portion of a sinner fall on her. As the going up a sandy way is to the feet of the aged, so is a wife full of words to a quiet man. A wicked woman is abasement of heart, and sadness of countenance, and a wounded heart. A woman that will not make her husband happy is as hands that hang down, and palsied knees. From a woman was the beginning of sin, and because of her we all die. A silent woman is a gift of the Lord."

The "wickedness" to which so much exception was taken seems to have been contentiousness. The wise man of the East, desirous of leading a contemplative life, was simply worn to death by an ill-tempered, talkative wife. That was why a silent woman—was a gift of the Lord. The only bit of conversation on the part of Socrates with Xantippe that is recalled is the word, "Hush!"

Fat Woman Has Light Fingers.

Step lively. Watch your step. Also keep your eye on any fat woman riding in the subway. To add to the various and extensive difficulties of subway travel there has appeared over the underground horizon within the last three weeks a very stout woman with big and light hands who is collecting pocketbooks. She is very quick, very crafty in her general conduct and has been very, very successful. Last night while one of the woman passengers was absorbed in reading the back of a newspaper which belonged to a man across the aisle, the door opened, many left and as it was about to shut again the stout woman leaped up, hit the tired-looking man on the hat and fled, announcing that it was their station. Everyone present smiled, and so did the woman, who was reading the other man's newspaper, until she looked for her pocketbook, which had been on her lap. The train had left the station and there was nothing to be done. Scores of complaints have been recorded, and unless the stout woman exercises with frightful energy to disguise herself business is going to slow up abruptly.—New York Times.

Couldn't Feaze Fat Man.

One of those post-Christmas stories that are told. Bene Zene.

"On a Payne avenue car, Christmas eve, a meek-looking man occupied a front cross seat in the back end of the car. (It can be done. Ed.) A 250-pounder came in and slammed himself down upon the vacant end of the seat. The meek-looking fidgeted, showed signs of distress, rose and crawled out, and as he went he said: 'You can have it. Help yourself. This is Christmas.' He took a side seat and said to a passenger, 'He wanted my seat. He got it. Take a quaint at him—looks like a funny picture in a paper. Some of the passengers smiled, some guffawed, but it didn't tease the big fellow. When a few blocks further on the meek-looker got off, the fat man gave him a generous grin, waved his hand and shouted, 'Merry Christmas!'"—Cleveland Leader.

In Golf Terms.

"Yes, I am learning to shave myself." "What progress?" "Oh, I can go over the course in 110, or thereabouts."—Louisville Courier-Journal.

WAR-BOUND SWITZERLAND

FEDERAL PALACE AT BERN

WAR-BOUND Switzerland has been confronted with probably the most discouraging economic difficulties brought about by the world war for any neutral country, for it depends upon other nations for most of its raw materials, for much of its supply of wares for home consumption, and for the handling of all its over-sea business, says a bulletin of the National Geographic society.

Although not quite one-third as large as New York state, without any important coal and iron deposits, and unable to produce enough food to cover the demands of its people, Switzerland, nevertheless, has, due to several great advantages which balance the unfavorable conditions, progressed in wealth and comforts on even terms with its powerful neighbors. It has become an industrial country of first rank and, at the outbreak of the war, it possessed an important and growing commerce with many countries.

Like Holland, the remarkable progress of Switzerland must be credited to the character of the people and to the encouragement of their free institutions. Nearly half of the country is largely unproductive. All of that part of Switzerland which lies toward Italy in the south is a bare, snow-and-ice crowned mountain land, including unexploited forests and a few high pastures. In the north, around Lake Constance, are found rich vineyards, while above the vineyards on the middle slopes of the Juras, are pasture lands where the cows are kept, from whose milk the famous Swiss cheeses are made.

Industrial Belt Is Wide.

Industrial Switzerland forms a wide belt, which stretches from the Austro-Hungarian border around to central

MARKET SQUARE, BASEL

France. Here cotton, laces, embroideries, machines, silks, straw-plaiting, ribbons, locomotives, watches, clocks and leather wares are manufactured for export; while in the hills and flat lands of the central plain are situated the Swiss farms, many of the important dairies, straw-plaiting, wood-carving and chemical industries. The straw-plaiting is made by the peasantry. It is a home industry, as is that of the Swiss wood carving. Despite its isolation in the midst of great industrial competitors and its lack of almost all of the important raw materials, it is to its mills and factories that Switzerland mainly owes its wealth.

The mountain republic derives less support from its agriculture than does any country in Europe except Norway, for only about one-sixth of it can be tilled. Many of its farms have been coaxed into being on the abrupt mountain sides, and to till them is almost as dangerous a task as that of the structural iron worker on a skyscraper. Fully half of the country lies above the zone of agriculture, and much of the soil that could be made productive is used as pasture land. Switzerland grows hemp, flax, caraway, fruits (citron, lemon, mulberry, orange, olive and pomegranate), corn, maize, oats, poppies, potatoes, barley, rye, spelt, saffron, tobacco and wheat. In normal times it had to import from Russia, Hungary and the United States three times as much wheat as it produced. It produces considerable value in timber.

Not Much in the Way of Minerals.

Moreover, there is no important mineral production in Switzerland, for the mountains belong to geological formations unproductive of valuable minerals. Some coal is found in the cantons of Valais, Vaud, Fribourg, Berne and Thurgau and some iron in the Jura. Rock salt and building stone form the most important mineral products. The Swiss have to depend upon wood and foreign coal for fuel and upon foreign ores in their metal working industries. Germany and France contributed coal, metals, wool, flax,

and cereals to Swiss markets. Liverpool sent the cotton to the great goods and embroidery factories at St. Gall, while Italy furnished the silk, straw for plaiting, grains, fruits, wool, skins and a certain proportion of the cotton.

So it was upon the output of manufactured articles for export that the Swiss depended for their support. More than one-third of the people were engaged in manufacturing industry; and, in Zurich, Bern and St. Gall, business everywhere made the traveler from America forget Swiss scenery and think of home. In St. Gall the cotton industry centers. Cloths, manufactured here, are made of American cotton and are noted for their fineness of texture and excellence of finish. Here, too, are made the well-known Swiss machine embroideries and etched laces. Watch and clock making are carried on around Geneva and along the French border. This industry has suffered heavily under increasing American competition; for the American factories turn out watches every bit as good, and as reasonable in price. The silk industry of Switzerland is found in Zurich. Basel, upon the Rhine, is the first customs station.

The advantages that have aided the Swiss in their energetic strivings for material well-being are, for the most part, such advantages as can be of little use while their neighbors on every hand are at war. One of the great aids to Swiss industrial progress has been the superabundance of water power, the nearness of the French coal fields of St. Etienne, moderate wages paid for labor, nearby markets for the purchase of raw materials and for the sale of manufactured goods, and an excellent system of communication.

France. Here cotton, laces, embroideries, machines, silks, straw-plaiting, ribbons, locomotives, watches, clocks and leather wares are manufactured for export; while in the hills and flat lands of the central plain are situated the Swiss farms, many of the important dairies, straw-plaiting, wood-carving and chemical industries. The straw-plaiting is made by the peasantry. It is a home industry, as is that of the Swiss wood carving. Despite its isolation in the midst of great industrial competitors and its lack of almost all of the important raw materials, it is to its mills and factories that Switzerland mainly owes its wealth.

The mountain republic derives less support from its agriculture than does any country in Europe except Norway, for only about one-sixth of it can be tilled. Many of its farms have been coaxed into being on the abrupt mountain sides, and to till them is almost as dangerous a task as that of the structural iron worker on a skyscraper. Fully half of the country lies above the zone of agriculture, and much of the soil that could be made productive is used as pasture land. Switzerland grows hemp, flax, caraway, fruits (citron, lemon, mulberry, orange, olive and pomegranate), corn, maize, oats, poppies, potatoes, barley, rye, spelt, saffron, tobacco and wheat. In normal times it had to import from Russia, Hungary and the United States three times as much wheat as it produced. It produces considerable value in timber.

Moreover, there is no important mineral production in Switzerland, for the mountains belong to geological formations unproductive of valuable minerals. Some coal is found in the cantons of Valais, Vaud, Fribourg, Berne and Thurgau and some iron in the Jura. Rock salt and building stone form the most important mineral products. The Swiss have to depend upon wood and foreign coal for fuel and upon foreign ores in their metal working industries. Germany and France contributed coal, metals, wool, flax,

Introducing Foreign Plants.

The introduction of foreign seeds and plants by the United States department of agriculture has assumed immense proportions. The total number of varieties introduced since 1907, when the section of seed and plant introduction was established, amounted last July to more than 40,600. During the last year more than 2,000 varieties were introduced, while 171,831 experimental plants and 11,465 packets of seed were placed with experimenters, and a record was kept of each. During the same year more than 500 shipments of experimental seeds and plants were made to foreign agricultural institutions, in exchange for material sent to this country by them.

Wise Father.

Carrye Wise—What did papa say when you asked him for my hand? Charlie Nokoyne—He said the family was overcrowded now.

He Knew.

She (quoting)—"Love took up the harp of life—" He (absently)—And tuned it to domestic strife.

**Print Blurs When Read-
ing**
Are Glasses Necessary?

If print blurs while reading, it indi-
cates, in young people, an exhausted
focusing power of the eyes either thro
extreme weakness or a defect in the
eyes that puts more work on the eyes
than they can do. Glasses are a great
relief in either case. In older people it
is a natural consequence due to age.
The older they grow the more pro-
nounced the vision usually begins to re-
cede—the print held farther from the eyes—
between the ages of forty and forty-five.
The only remedy is glasses and it is a
very great aid in preserving the eyesight
to get the glasses as soon as the first
symptoms appear. At Dr. Merrill's
office Monday, Feb. 28.

Mrs. Cowles' Letter

S. S. Roma,
Dec. 17, 1915.

Dear Friends,
What do you suppose has happened
now? Here we are sailing away for Lis-
bon as fast as steam can carry us. When
we reached the Azores our "Command-
ant" received word from his company
in Marseilles ordering him to come di-
rect to Lisbon and not go to Madeira at
all. Can you imagine the excitement and
commotion among those of us who took
this steamer solely and only because it
was going to Madeira? Our men got
together, held an indignation meeting
and drew up a written protest. All to
no avail however. The reason given
first for the change was that there were
submarines around Madeira. None of us
believed that. Now we hear that it is
because this boat has been requisitioned
for the war. This we believe to be the
real reason. Anyway here we are tum-
bling away again on old briny and the
five lovely days of rest we had so count-
ed on having in Madeira we will spend
upon the sea. We are none of us keen
upon seeing Lisbon, especially since, at
best, we shall have but a few hours there.
I am especially sorry for Mr. Cowles
who is already so exhausted by loss of
sleep and nourishment. It is a ques-
tion how well he will stand this extra
dose of sea travel. He is asleep in the
chair beside me as I write, trying
not to mind the swell, which keeps us
tumbling. I believe this old boat would
roll even in dry dock. "A steam roller"
some one has christened her. Of course
the company pays our fare to Lisbon so
there is no expense for us or for the six-
ty third class passengers who were
booked for Madeira. Of course as we
approach Europe the talk is all of sub-
marines, and so forth, but no one really
believes we shall encounter one. There
is a gentleman on board from Philadel-
phia, representing a company worth
\$50,000,000. He has letters from Pres.
Wilson, etc., and declares there would
be war between the U. S. A. and Ger-
many tomorrow if the Germans torped-
ed him. Perhaps this distinguished
gentleman will be our salvation! He is
very plainly somebody, anyway!

So far the biggest reminder of war we
have seen was a big British battleship
in the harbor of Ponta Delgada at the
Azores. Beside it in the harbor lay four
or five German merchant men looking
as meek as Moses! No one of them dared
stir outside the neutral three mile
limit, for of course they would then be
fired upon. There was something amus-
ing about it somehow to see all those big
ships held at bay in the harbor by one
gray gun-boat. In this harbor, also, we
saw for the first time the flags of the dif-
ferent nations painted on both sides of
each ship, two flags on a side. This for
the benefit of submarines, we were told.
Of course the stars and stripes were the
handsomest, even if the old black tramp
they were painted on was rather disrepu-
table!

(To be Continued)

F. A. U. Entertained

Palm Leaf Council met in regular form
on Feb. 12 with all officers in their places.
The regular business of the evening was
finished quickly to give time to Messrs.
Squires and Alfred Hibbs a trio of artists
from the State Normal School who were
real entertainers, and those who failed to
attend lodge missed a real treat. Miss
Olga Evans also gave a musical number
which was much appreciated.
Refreshments were served and the re-
mainder of the evening spent in dancing.
The next meeting will be on Feb. 26
at which time there will be an Ex-
change Social and refreshments.
Let all members attend.

Mrs. H. H. Bearce of Morgan Hill is
spending the week with her parents,
Mr. and Mrs. J. J. Vandergon.

Mrs. C. J. Ludwig was given a most
pleasant birthday surprise Monday
evening when a number of her neigh-
bors of Central avenue called in a body.
The time was spent with cards, games,
and music, closing with refreshments.

Tuesday evening, after a day of pleas-
ure, the North Central avenue neighbors
trouped in on Mr. and Mrs. C. S. Inman
giving them a complete surprise. The
day was the 46th anniversary of their
wedding. Games and music filled the
time until a late hour when the culinary
products of the lady visitors were tested
by the famishing men and best wishes
for many more years of wedded happi-
ness for the bride and groom were ex-
pressed.

Notice to Creditors

Estate of Clara Richards Lane, also known as
Clara Richards, Deceased.
Notice is hereby given by the undersigned ad-
ministrator of the estate of Clara Richards Lane,
also known as Clara Richards, deceased, to the
creditors of and all persons having claims against
the said deceased, to file them, with the necessary
vouchers, in the office of the Clerk of Superior
Court of Santa Clara County, California, or to ex-
hibit same, with the necessary vouchers, within
four months after the first publication of this
notice, to the said administrator at the office of L.
D. Bohnett, Rooms 313-314 Bank of San Jose
Building, in the City of San Jose, County of Santa
Clara, State of California, where all business con-
nected with said estate be transacted.
San Jose, this day of February, A. D. 1916.

B. E. Keil,
Administrator of the Estate of said deceased.
L. D. Bohnett,
Attorney for said Administrator.

BOOST THINGS!

DON'T sit supinely on your roost, but come along and help us
boost, for better things of every kind, and leave your kicking clothes
behind. O let us boost for better streets, and softer beds, and longer
sheets; for smoother lawns and better lights, and shorter-winded blath-
erskites; for finer homes, and larger trees, for bats and boots and bum-
ble bees; for shorter hours and longer pay, and fewer thistles in our
hay, for better grub, and bigger pies, for two more moons to light the
skies. And let the wolves of war be loosed on every man who doesn't
boost.—Walt Mason.

Local and Personal

Miss Mary Miller is here from San
Francisco for a month's vacation.

The last of the monthly birthday
socials will be held Tuesday evening fol-
lowing the concert.

Herbert Wade has rented the Mrs.
Lucy Bull property on North First Street,
where they are now living.

Byron Alard and family were over
from Chowchilla, for the Old Settlers' re-
union, and a visit with friends.

Mr. and Mrs. H. G. Baugh of San
Francisco were guests of Mr. and Mrs.
W. B. Kammerer from Saturday to
today.

John Spencer has sold his home on
Sunnyside to Dr. Banks who comes
from South Carolina. Mr. Spencer has
rented a house on Edwards Ave., San
Jose.

Rev. Geo. E. Atkinson spent Sunday
afternoon and all day Monday at the
Men's Convention in S. F. returning
Tuesday morning in time to get a part
only of the Washington's Day Address.

The Danish Musical Club will give a
Concert in the Congregational Church
Tuesday evening, Feb. 29th under the
auspices of the Guild. Following the
program the February Birthday Social
will be held. Admission to the Concert
includes both, 25c.

The Johnson Avenue Improvement
Club met Monday evening, Feb. 21st, at
the home of G. W. Snyder, with the
gentlemen living on the avenue as guests.
Mr. Moulton acted as chairman and
many bright and helpful suggestions for
improving the avenue were discussed.
Light refreshments were served and a
very pleasant evening enjoyed.

The local Homestead Brotherhood of
American Yeomen will hold a basket
supper and dance at the banquet room
in the I. O. O. F. building after the regu-
lar meeting next Wed. Every body is
invited to bring his lady and basket lunch.
Frank Perry recently sustained a double
fracture of the forearm and is now thank-
ing his stars that he carried a Yeoman
policy which also insures for accidents.

Prof. and Mrs. H. K. Mussey, who
have been visiting Mrs. Ellen R. Smith,
will leave this week for Seattle, from
which port they take boat for a visit of
several months in the Orient. Prof.
Mussey is on an eight months' leave of
absence from Columbia University
where he is a professor of Economics.
This is their first visit to California and
they are delighted with the state and our
particular valley.

The Press is in receipt of a pleasing
write-up of Campbell which appeared in
Joliet (Ill.) Sunday Herald-News, Oct.
3, 1915. The article of almost two
columns was written by Miss Estelle
Castle who visited relatives here shortly
before the above date. Miss Castle is
one of the News staff and wrote com-
prehensive articles on the various points
she visited during her western trip.
Thus are we advertised by our friends
among whom Miss Castle has proved to
be a valued one.

Grange Program

Orchard City Grange met at I. O. O.
F. Hall Tuesday evening as usual, with a
good attendance.

The matter of the organization of the
Prune and Apricot growers was dis-
cussed and the work of Market Commis-
sioner Weinstock in the interests of the
growers was endorsed.

The Lecturer's hour was filled with an
interesting program. Instrumental
music by Mrs. M. Sholz and Robert.
Readings by the members—being quota-
tions from eminent men on Washington
and his life.

A very impressive service was then
held in honor of the "Father of Our
Country." A large portrait of Wash-
ington stood on an easel in the front of
the hall, a beautiful green wreath was
placed over it by Mrs. Weisendanger
who recited an appropriate verse as she
placed the wreath. Following came
eleven other sisters who each placed a
flower in the wreath speaking words of
love and affection for our great hero
whose birthday we celebrate. Each one
then taking their place in line on either
side of the portrait and closing with the
song "Our Washington."
Mrs. Ada Butts favored us with a solo
which was much appreciated.

Mrs. W. L. Merrill read extracts on the
death of Washington from a paper 116
years old, also other interesting items—
followed by singing Mount Vernon Bells
by the grange.

The next grange social will be held at
the Coffee Club, Tuesday evening, Feb.
29th.

In the Superior Court of the County of Santa Clara, State of California

In the Matter of the Estate of) Order to Show
Edward Shaw.) Cause Why Order
of Sale of Real Es-
tate Should not be
Made.

It appearing to the undersigned, Judge of said
Court, by the petition this day presented and filed
by John F. Duncan, the administrator of the estate
of Edward Shaw, deceased, praying for an order
of sale of real estate, that it is necessary to sell the
whole of real estate, to pay the debts, expenses,
and charges of administration of said estate.

IT IS THEREFORE ORDERED, by the under-
signed, Judge of said Court, that all persons inter-
ested in the estate of said deceased, appear before
the said Superior Court on Friday, the 24th day of
March, A. D. 1916 at 10 o'clock in the forenoon of
said day, at the Court-room of said Superior Court
at the Court House in San Jose, County of Santa
Clara, to show cause why an order should not be
granted to the said administrator to sell all of the
real estate of the said deceased.

And that a copy of this order shall be published
at least four successive weeks in the Campbell In-
terurban Press, a newspaper printed and publish-
ed in said County.

P. F. Goshey, Judge.
Dated February 21st, 1916.
L. D. Bohnett,
Attorney for Administrator.

Methodist Church Notes

The pastor is in receipt of certificates
transferring to this church the mem-
bership of Mr. and Mrs. Percy Lovejoy
who have recently come from the north-
ern part of the state to a ranch on McCoy
Ave.

The pastor will preach at the usual
hour Sunday morning, and will conduct
a combined service at seven o'clock in
the evening. The evening topic is "The
Gold of God," and every leaguer is
urged to bring a Bible.

The second quarterly conference for
the current year will be held Monday
evening at 7:30, Dr. Stephens presiding.
At the close of prayer meeting
Wednesday evening, the monthly meet-
ing of the Official Board will be held.

Mrs. Jennie P. Lewis has requested
the transfer of her membership to Mills,
New Mexico, where there is a Method-
ist church near her new home.

Congregational Church

"The Friendly Church just around the
Corner."

The morning theme is "Who is He?
Why should I care?" being in a series
looking forward to Easter. Talk to the
boys and girls on "Lanterns" in the
series on "Ships and Sailing."

Juniors at 3 P. M. C. E. and Sunday-
school as usual.

Dr. Kammerer was called to Japan by
cable and so cannot be with us Sunday
evening, but we will have a report of the
great men's meeting in the city. Our
church was credited with 5 delegates,
who with the Pastor, will report this
tremendously important meeting. Come
and hear them.

Next week at prayer meeting our
topic in Bible study will be "The Only
Story of Christ's Life written by one who
did not personally know Him", Luke.

Come and enjoy these studies with us.
You are cordially invited to worship
with us at all our services.

GEO. E. ATKINSON, Pastor.

Club To Grow Spuds

An agricultural club has been organ-
ized at the High School with potatoes
for the chosen crop this season. The
six best potato raisers in the Club will
go to the University farm at Davis, for
an outing of a week. During this vaca-
tion the party will be given lectures on
various agricultural subjects and enjoy
such sports as baseball, swimming and
push ball.

This club, like others about the state, is
organized for better farming and de-
serves the encouragement and boost of
every body in the community.

The club members are, Jerome Arends,
president; Eric Bydekarken, vice-presi-
dent; Rudolph Hoerler, secretary; Wilbur
and Floyd Howes, Earl Page, Elard La
Montagne, Roy and Max Bartholomew,
George Guhe, Manual Lopes, Ernest
Downing and Archie Steindorf.

Robert Holmes, Sr., has rented the
Whitman cottage on North Central Ave.,
and is occupying it.

Oluf Strom has had the street which
will be South Third, and which opens
up his residence tract, graded, and is
graveling the same, preparatory to hav-
ing it accepted by the commissioners as a
highway. Mr. Strom has put a great
deal of time and expense into making
his property attractive and ready for
sale. Such improvements as he has
made there, S. G. Rodeck on North sec-
ond street, and the Hyde Investment Co.
on Hyde Residence Park, add greatly to
the appearance of our village and make
all property more valuable and salable.

In the Superior Court of the State of California, in and for the County of Santa Clara

Sarah C. Oldham and Inez C. Shields, also
known as Inez Shields,

Plaintiffs,

vs.

Charles A. Hunt, as Administrator of the Estate
of E. M. Hunt, deceased; Orrin Simmons, and
"also all other persons unknown, claiming any
right, title, estate, lien or interest in the real prop-
erty described in the complaint adverse to plain-
tiffs' ownership, or any cloud upon plaintiffs' title
thereto."

Defendants.

Action brought in the Superior Court of the State
of California in and for the County of Santa Clara
and the complaint filed in the office of the clerk
of said County of Santa Clara.

The people of the State of California send greeting
to Charles A. Hunt, as Administrator of the Estate
of E. M. Hunt, deceased; Orrin Simmons, and
"also all other persons unknown, claiming any
right, title, estate, lien or interest in the real prop-
erty described in the complaint adverse to plain-
tiffs' ownership, or any cloud upon plaintiffs' title
thereto."

You are hereby directed to appear and answer
the complaint in an action entitled as above
brought against you in the Superior Court of the
State of California, in and for the County of Santa
Clara, within ten days after service upon you of
this summons if served within this county, or
within thirty days if served elsewhere, and you
are hereby notified that unless you so appear and
answer as above required the said plaintiffs will
take judgment for any money or damages de-
manded in the complaint as arising upon contract,
or will apply to the Court for any other relief de-
manded in the complaint.

The object of the action is to determine all ad-
verse claims to and clouds upon plaintiffs' title to
certain real estate situate in the County of
Santa Clara, State of California, and particularly
described as follows, to-wit:

Beginning at a point on
the Northern line of Saratoga Avenue, (formerly
known as McCarthysville Road), 30 feet Easterly
from the Southeast corner of the two-acre tract
conveyed by E. M. Hunt, et al., to William
James Thompson by deed dated September 28th,
1878, and recorded in Liber 46 of Deeds, page
291 in the office of the County Recorder of the
County of Santa Clara, State of California, said
point being 11 rods and 15 1/2 feet East from a
stake marked "9" standing on the North side of
said road or avenue; thence Northerly and parallel
to the Easterly line of said two-acre tract to the
center of the Outlot or Campbell Creek; thence
Westerly and along the center of said creek to the
Easterly boundary line of land of Kennedy;
thence North 150 West to a stake marked "C" in
the center of said Outlot or Campbell Creek; thence
South 200 E., 3.43 chs. to an Alder tree marked
"C5"; thence North 83° East to the Northwest corner
of that tract of land as described in that
certain deed dated December 8th, 1888 executed
by Caroline Brewer to Inez Shields and recorded
in Book 114 of Deeds, page 136, Records of Santa
Clara County, California; thence Southerly 361
feet, more or less along the Westerly boundary
line of said land of Inez Shields to the Northern
line of Saratoga Avenue; then Southwesterly
along the Northern line of said Saratoga Avenue to
the point of beginning.

And the plaintiffs in said action seek judgment
that they are the owners in fee simple of the whole
of said property; that the above named defend-
ants, and also all other persons unknown claiming
any right, title, estate, lien or interest in the said
real property adverse to plaintiffs' ownership, or
any cloud upon plaintiffs' title thereto be fore-
closed and enjoined, and forever restrained from
asserting any right, title, estate, lien or interest in
said real property, or any part thereof and for
such other and further relief as to the Court may
seem just.

GIVEN under my hand and the seal of the
Superior Court of the State of California, in and for
the County of Santa Clara, this 2nd day of
February, A. D. 1916.

Henry A. Pfister, Clerk.
By R. V. Bressoni, Deputy Clerk.

In the Superior Court of the State of California, in and for the County of Santa Clara

In the Matter of the Estate of) Order to Show
Jane Cordelia O'Neil.) Cause Why Order
of Sale of Real Es-
tate Should Not Be
Made.

It appearing to the undersigned, Judge of said
Court, by the petition this day presented and filed
by John F. Duncan, the administrator of the es-
tate of Jane Cordelia O'Neil, deceased, praying for
an order of sale of real estate, that the sale of all
of said real estate will be for the advantage,
benefit, and best interests of the said estate and
those interested therein.

IT IS THEREFORE ORDERED by the undersigned,
Judge of said Court, that all persons interested in
the estate of said deceased appear before the said
Superior Court on Friday, the 3rd day of March,
A. D. 1916, at 10 o'clock in the forenoon of said
day, at the Courtroom of Department 2 of said
Superior Court, at the Court House in San Jose,
County of Santa Clara, to show cause why an order
should not be granted to the said adminis-
trator to sell all of the real estate of the said
deceased.

And that a copy of this order shall be pub-
lished at least four successive weeks in the Camp-
bell Interurban Press, a newspaper printed and
published in said County.

P. F. Goshey, Judge.
Dated February 2nd, 1916.

In the Superior Court of the County of Santa Clara, State of California

In the Matter of the Estate of) Order to Show
H. T. HITE.) Cause Why Order
of Sale of Real Es-
tate Should not be
Made.

It appearing to the undersigned, Judge of said
Court, by the petition this day presented and filed
by Ada Williams Hite, the Administratrix of the
estate of H. T. Hite, deceased, praying for an or-
der of sale of real estate, that it is necessary to sell
the whole of real estate, to pay the debts, expen-
ses and charges of administration of said estate.

IT IS THEREFORE ORDERED by the undersigned,
Judge of said Court, that all persons interested in
the estate of said deceased, appear before the said
Superior Court on Friday, the 24th day of March,
A. D. 1916 at 10 o'clock in the forenoon of said day,
at the Court-room of said Superior Court, at the
Court House in San Jose, County of Santa Clara,
to show cause why an order should not be granted
to the said administratrix to sell all of the real es-
tate of said deceased.

And that a copy of this order shall be publish-
ed at least four successive weeks in the Campbell
Interurban Press, a newspaper printed and pub-
lished in said County.

P. F. Goshey, Judge.
Dated February 21st, 1916.
L. D. Bohnett,
Attorney for Administratrix.

The first league baseball game will be
played on the local diamond Saturday
afternoon between Campbell High and
Palo Alto. Come out and encourage the
boys with a large attendance.

Notice of Time Set for Probate of Will in the Superior Court of the County of Santa Clara, State of California

In the matter of the Estate of
John N. Preston, Deceased.

A document purporting to be the last
Will and Testament of John N. Preston,
deceased, having on the 17th day of
February, A. D. 1916, come into the pos-
session of said Superior Court, and a
petition for the probate thereof and for
the issuance of letters testamentary to
John F. Duncan having been filed by
John F. Duncan with me, the clerk of
said Court, notice is hereby given that
Friday, the 3rd day of March, A. D. 1916,
at 10 o'clock A. M. of said day in De-
partment 2 of the Court room of said
Court, at the Court House, in the City of
San Jose, in the County of Santa Clara,
has been set as the time and place for
proving the will of said John N. Preston
deceased and for hearing the application
of said John F. Duncan for the issuance
to him of Letters Testamentary when-
and where any person interested may
appear and contest the same.

Given under my hand and the Seal of
said Court, this 17th day of February,
1916.

Fry & Jenkins, Attorneys for Plaintiffs.

Beware of Ointments for Catarrh that Contain Mercury

as mercury will surely destroy the sense
of smell and completely derange the
whole system when entering it through
the mucous surfaces. Such articles
should never be used except on prescrip-
tions from reputable physicians, as the
damage they will do is ten fold to the
good you can possibly derive from them.
Hall's Catarrh Cure, manufactured by
F. J. Cheney & Co., Toledo, O., contains
no mercury, and is taken internally,
acting directly upon the blood and
mucous surfaces of the system. In buy-
ing Hall's Catarrh Cure be sure you get
the genuine. It is taken internally and
made in Toledo, Ohio, by F. J. Cheney
& Co. Testimonials free.
Sold by all Druggists. Price 75c per
bottle.
Take Hall's Family Pills for constipa-
tion.
